

Cape and Islands Family Support Network

INDIVIDUAL PROVIDER APPLICATION

To be considered for placement in the **Cape and Islands Directory**, please review this application and send in all requested materials within two weeks.

Health care practitioners seeking changes to their provider summaries can do so only in August. This will allow us time to make these revisions before sending a link of the updated directory to our leadership team in early September.

Please review the sample application on page two, and then complete our individual provider form on page three. This third page will provide in-depth information on your clinical practice with prospective clients, their family members, treatment facilities seeking outpatient providers post-discharge, and local health care practitioners seeking additional team members for the clients in their care. (In order to make all entries consistent, please follow the content and structure of the completed application. If an item is not relevant, please write N/A in the space provided. Also, note that your bio can be no longer than 250 words).

The Cape and Islands Family Support Network is currently developing Eating Disorder Treatment Teams throughout this region. Upon approval of your application, you will be placed on the team(s) that correspond to the office locations identified in your application. (Please note that all provider affiliates must offer either one pro bono consult, individual session or in-service training per year).

Biography

Dawn Hynes, MSW, Founder of Hynes Recovery Services (HRS), holds a Master's Degree in Social Work from Washington University in St. Louis. She is a passionate advocate dedicated to making eating disorder treatment accessible to more people and providing practitioners with state of the art training and resources. For the past 25 years, Dawn has been active in eating disorder recovery work as an advocate, clinician, and volunteer. She has trained staff, developed clinical manuals, and worked with groups and individuals at Boston Children's Hospital and Laurel Hill Inn's Residential Treatment Program. As a volunteer, she has helped thousands of families worldwide find resources and treatment referrals, created and distributed comprehensive eating disorder manuals to eating disorder organizations nationwide and has also worked with a team of clinicians helping both celebrities and Olympic athletes connect to treatment.

Dawn founded HRS out of the significant need to provide college students and their families with the tools and resources necessary to ensure a successful transition to college for those battling an eating disorder.

HRS is located in two separate Massachusetts communities (Falmouth and Wellesley).
